

## **MRT Introduces 1997-2004 C5 Corvette Axle-Back Exhaust**

### **For Immediate Release:**

**Plymouth Michigan-** MRT is proud to introduce their [C5 Corvette Axle-Back Exhaust system](#). This new system gives Corvette owners a deep, aggressive sound when they put the pedal to the metal, but a deep, rich, milder exhaust note when daily driving. Check out the sound at: [www.youtube.com/MRTcars](http://www.youtube.com/MRTcars)

The new [MRT C5 Corvette exhaust system](#) is designed, engineered and manufactured in the MRT state of the art facility located in Plymouth, Michigan. The Corvette axle back exhaust system is crafted utilizing high quality, 304 stainless steel and is CNC mandrel bent for smooth exhaust flow. Four inch quad tips add an exciting appearance that speaks performance. Installation is simple and does not require any cutting or welding. The MRT axle-back system clamps on directly in place of the factory exhaust system.

Like all MRT designed, engineered and manufactured products, the [1997-2004 Corvette axle-back system](#) is designed to last and comes with an industry leading **LIMITED LIFETIME WARRENTY**.

MRT was founded in 2002 with a goal to help enthusiasts get the most out of their vehicles. The company is committed to high quality products that offer reliability and exceptional value. In addition to making high quality products, MRT offers a custom paint and performance shop located at MRT headquarters in Plymouth, MI.
